

# SlugSearch

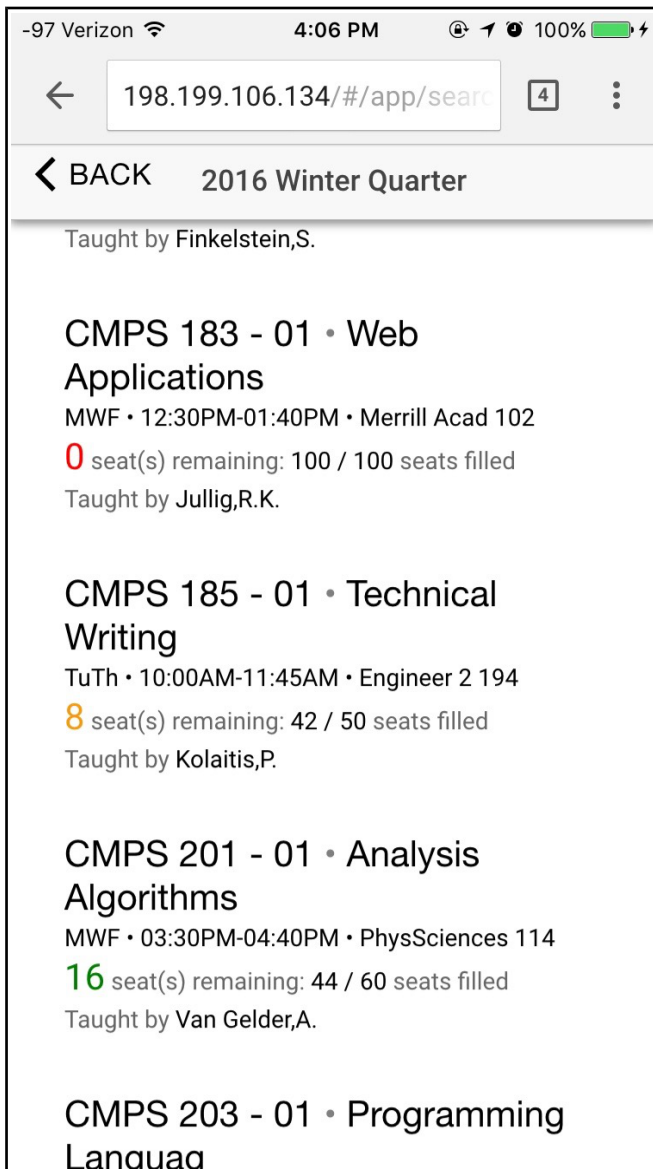

## User Guide

This is the home screen of SlugSearch. From here, you can search for classes. Tap a field to enter search filters.

The fields indicate which parameter you selected, but you don't have to use every filter when searching. Tap **Submit** to search.

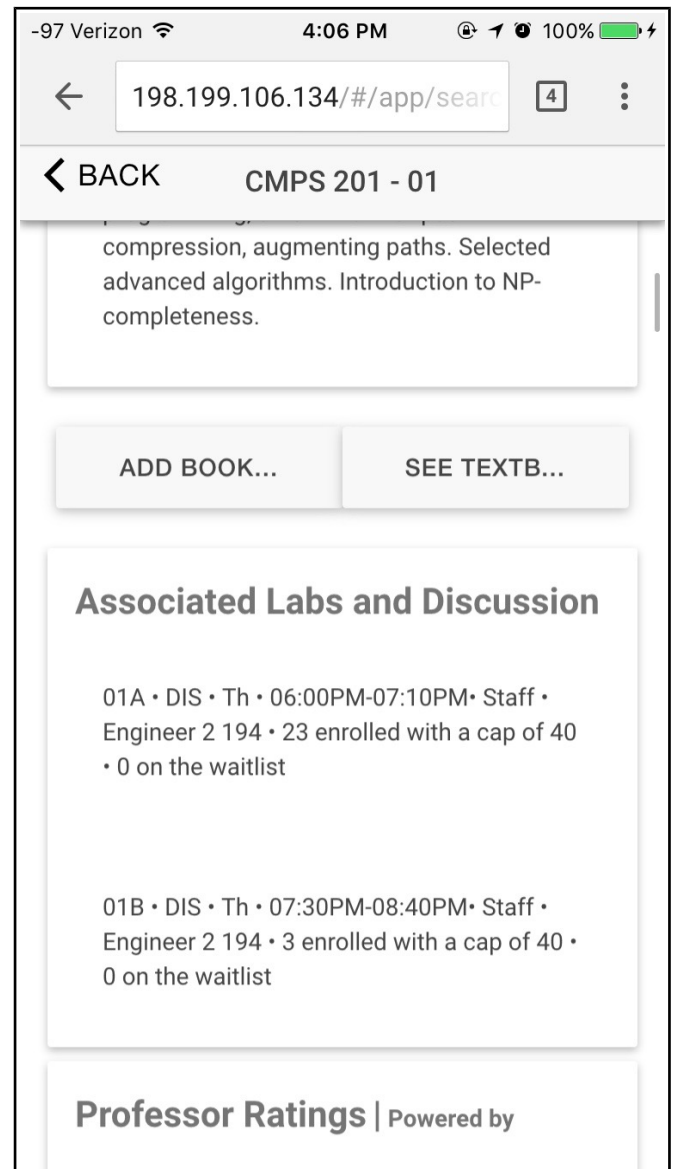

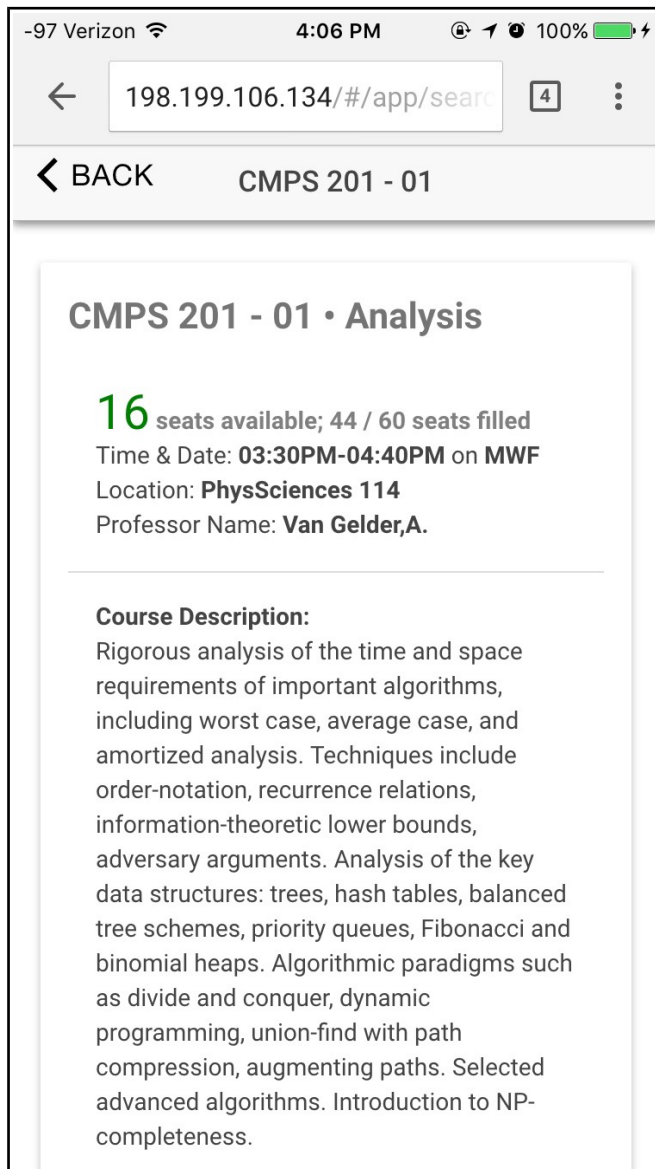

The results page displays all classes found that match your search filters.

Each class displays the class **number**, **name**, its **date**, **time**, and **location**.

The colored number indicates how many open seats remain in that class:

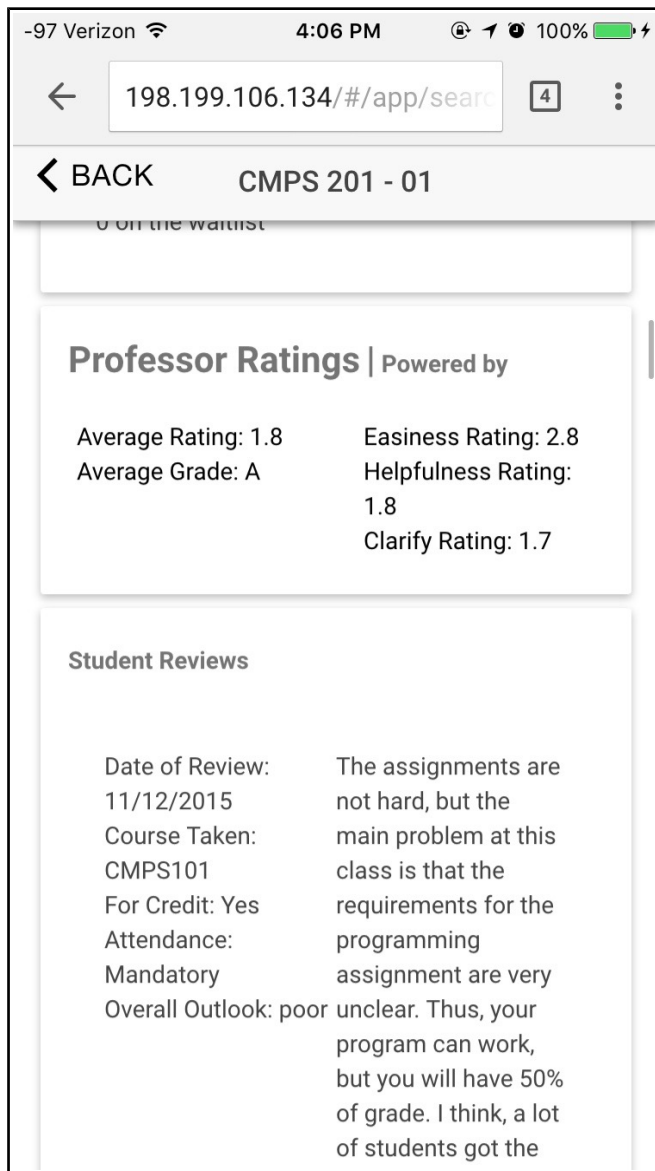

- **Green**: More than 25% of seats are open.
- **Yellow**: Fewer than 25% of seats are open.
- **Red**: The class is full.

Each result also lists the **name of the professor/lecturer**.

Tapping a class in the results page opens its class page, which contains all of the same information along with the **class description**.

Scroll down to find the **Add Bookmark** and **See Textbooks** buttons. You can also see the class' labs and discussion information.

Below the lab and discussion information are the reviews, provided by **RateMyProfessors**.

This section contains all of the information found on the RateMyProfessors website:

### **Average Rating -**

The overall rating on a scale of 0 (worst) - 5 (best).

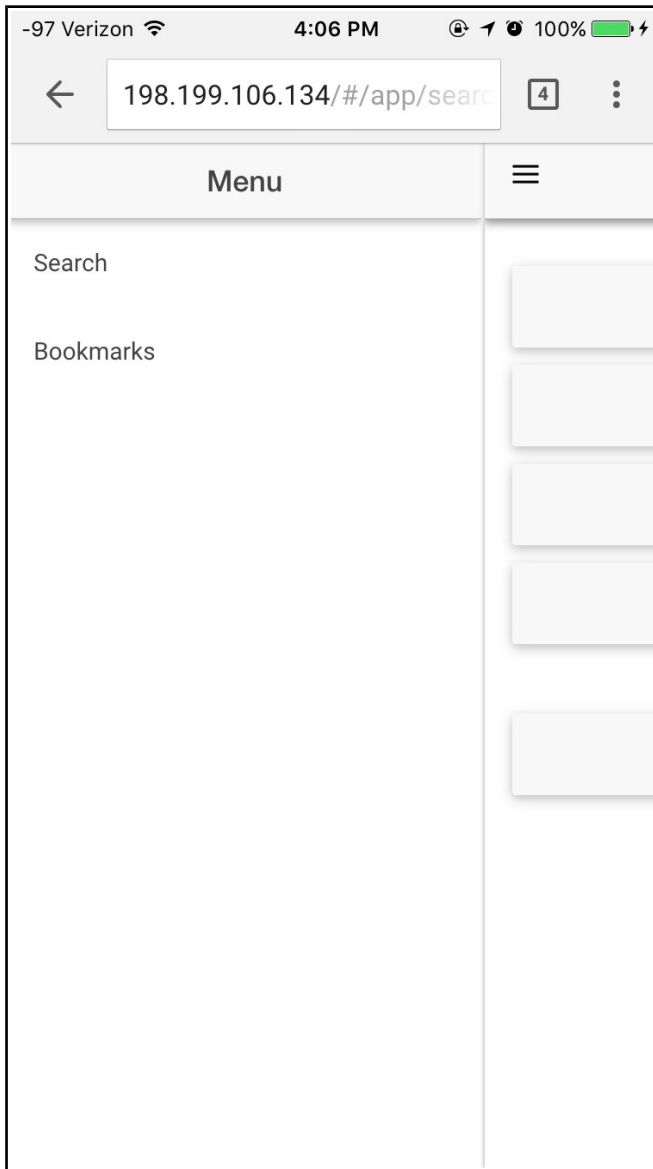

### **Average Grade -**

The overall grade of the professor.

### **Ratings -**

The measure of the professor's easiness, helpfulness, and clarity on a scale of 0 (worst) - 5 (best).

The student review section contains the RateMyProfessors reviews.
