Testing: Results View Module Taylor Stratton

Testing for this module consists of selecting the search parameters, then comparing the list of results to the list produced by MyUCSC when given the same parameters.

Equivalence Classes:

- EC1.1 Empty **Term** selection (user doesn't select a term)
- EC1.2 **Term** selected from drop-down, collected from web scraper
- EC2.1 Empty **Status** selection (user doesn't select a status)
- EC2.2 Status selected from drop-down, collected from web scraper
- EC3.1 Empty **Subject** selection (user doesn't select a subject)
- EC3.2 **Subject** selected from drop-down, collected from web scraper
- EC4.1 Empty **General Education** selection (user doesn't select general education)
- EC4.2 General Education selected from drop-down, collected from web scraper

Test Cases:

- Input = all empty selections; expected output = same output from MyUCSC given same input; covers all equivalence classes.
- Input = all empty except **Term**; expected output = same output from MyUCSC given same input; covers EC1.2, EC2.1, EC3.1, EC4.1
- Input = all empty except **Status**; expected output = same output from MyUCSC given same input; covers EC1.1, EC2.2, EC3.1, EC4.1
- Input = all empty except **Subject**; expected output = same output from MyUCSC given same input; covers EC1.1, EC2.1, EC3.2, EC4.1
- Input = all empty except **GE**; expected output = same output from MyUCSC given same input; covers EC1.1, EC2.1, EC3.1, EC4.1
- Input = **Term** and **Status** selected, all else empty; expected output = same output from MyUCSC given same input; covers EC1.2, EC2.2, EC3.1, EC4.1
- Input = **Term** and **Subject** selected, all else empty; expected output = same output from MyUCSC given same input; covers EC1.2, EC2.1, EC3.2, EC4.1
- Input = **Term** and GE selected, all else empty; expected output = same output from MyUCSC given same input; covers EC1.2, EC2.1, EC3.1, EC4.2
- Input = **Term**, **Status**, and **Subject** selected, **GE** empty; expected output = same output from MyUCSC given same input; covers EC1.2, EC2.2, EC3.2, EC4.1
- Input = **Status**, **Subject**, and **GE** selected, **Term** empty; expected output = same output from MyUCSC given same input; covers EC1.1, EC2.2, EC3.2, EC4.2
- Input **Term, Subject, GE** selected, **Status** empty; expected output = same output from MyUCSC given same input; covers EC1.2, EC2.1, EC3.2, EC4.2
- Input = **Term**, **Status**, and **GE** selected, **Subject** empty; expected output = same output from MyUCSC given same input; covers EC1.2, EC2.2, EC3.1, EC4.2
- Input = **Status** and **Subject** selected, all else empty; expected output = same output from

- MyUCSC given same input; covers EC1.1, EC2.2, EC3.2, EC4.1
- Input = **Status** and **GE** selected, all else empty; expected output = same output from MyUCSC given same input; covers EC1.1, EC2.2, EC3.1, EC4.2
- Input = **Subject** and **GE** selected, all else empty; expected output = same output from MyUCSC given same input; covers EC1.1, EC2.1, EC3.2, EC4.2
- Input = all fields selected; expected output = same output from MyUCSC given same input; covers EC1.2, EC2.2, EC3.2, EC4.2
